FSA says "Summer Picnics Start On The Farm"

Draw a picture of you and your family and friends having a picnic. What foods are your eating? Which plants and animals helped make that food? For example, milk and cheese start with cows; bread comes from grains, like wheat and rye, and potato salad contains lots of things grown on a farm. If you print your first name and age on the back and bring your drawing to your local FSA Office you might see it published at www.fsa.usda.gov/fsakids.

Which plants and animals helped make your picnic?
